

Edd Mann

Lead Software Engineer

Lead Software Engineer with 15+ years building reliable, evolvable systems using DDD, event sourcing, and AWS Serverless. Currently independent, delivering across embedded firmware, cellular telemetry, and cloud-native SaaS. Side projects explore the agentic AI ecosystem and LLM internals; host of Compiled Conversations.

WORK EXPERIENCE

Lead Software Engineer

Apr 2025 – Present

INDEPENDENT

End-to-end systems across embedded firmware, cellular telemetry, and cloud-native SaaS; currently engaged in the UK railway signalling sector.

- Built a multi-tenant SaaS for parsing and reporting level-crossing signalling logs, using Laravel, AWS Lambda, CDK, Twilio, and web-push.
- Built ESP32 telemetry firmware with cellular GPRS, publishing radar-speed and barrier-strike events over MQTT to a Terraform-managed AWS ingest pipeline.
- Owned client delivery end-to-end – domain modelling through trackside hardware to cloud-side reporting and alerting.

Lead Software Engineer

Jul 2022 – Feb 2025

INSTAPRO

Promoted to Lead Software Engineer following the MyBuilder–Instapro merger; shaped technical direction across teams and led key greenfield projects in a larger organisation.

- Led a major retailer integration service, running event storming sessions and collaborating with stakeholders from design to rollout. Delivered using React, TypeScript, PHP, and AWS Serverless.
- Drove architectural direction across teams, breaking up the monolith into vertical-slice services designed around subdomains and bounded contexts.

Site Reliability Engineer

Apr 2019 – Jul 2022

MYBUILDER

Focused on cloud-native infrastructure and platform enablement, supporting development teams and shaping architectural decisions.

- Led a greenfield insurance and underwriting system (MyBuilder Plus), delivered in under six months using DDD, Event Sourcing, CQRS, Hexagonal Architecture, Terraform, and Serverless.
- Migrated all services to AWS Lambda, reducing operational overhead and accelerating delivery.

Senior Software Engineer

Feb 2016 – Apr 2019

MYBUILDER

Promoted to Senior Software Engineer through MyBuilder's 2017 IAC acquisition; led infrastructure strategy and mentored engineers.

- Led migration from on-premises to AWS using Terraform across many AWS services.
- Built an event-sourced Tradespeople shortlist billing bounded context within the modular monolith.

Software Engineer

Jul 2014 – Feb 2016

MYBUILDER

Joined a small, agile team applying modern engineering practices across the stack; supported the move to a modular monolith with bounded contexts.

- Built a greenfield RESTful microservice for Tradespeople trade assessments, ensuring qualification standards on the platform.

Web Developer

Sep 2011 – Sep 2013

360 SOFTWARE SOLUTIONS

SKILLS

Leadership & Delivery · Product thinking · Stakeholder management · Architectural direction · Hiring and mentoring · Incident leadership

Languages · Python · TypeScript · JavaScript · Rust · PHP · SQL

Frontend · React · Next.js · Redux Toolkit · Tailwind CSS · WebAssembly

Backend & Architecture · Symfony · Laravel · Domain-Driven Design · Event Sourcing · CQRS · Hexagonal Architecture · Event-driven Architecture · Micro-frontends

Cloud · AWS Lambda · EventBridge · SQS · SNS · RDS · ECS Fargate · DynamoDB · Terraform · CDK · Serverless Framework

Tooling & Observability · Docker · GitHub Actions · Datadog · Grafana · Sentry

AI Tooling · MCP servers · Agent harnesses · LLM integration

PROJECTS

santa-lang

Functional, C-like programming language with five independent implementations – tree-walking interpreters, a bytecode VM, and an LLVM compiler – across Rust, Kotlin, and TypeScript.

My Own Coding Agent

Educational Python coding agent built from primitives – TUI, CLI, and FastAPI web shell, with provider-agnostic LLM support.

Serverless Fargate

Serverless Framework plugin for long-running Fargate ECS tasks – 18,000+ weekly downloads on NPM.

EDUCATION

Bachelor of Science in Internet Computing

Sep 2008 – Jul 2011

UNIVERSITY OF GREENWICH

First Class Honours
